SUBLIMATION • HEAT TRANSFER • DIGITAL PRINT

---

## WHAT IS SUBLIMATION ?

*Sublimation is method of printing your design or image or logo onto fabrics. It does so through a process that turns a solid directly into a gas through a high heat reaction. Which is then transfered and fused through high heat press back into a solid state onto the fabric for a lasting imprint giving you a the smoothest hand feel with a zero ink feel.*

*Display as many colors and logos you want. Print your Logos, names, numbers, sponsors or any background color/ digital effect in the design without limitations.*

*Advertise on our collection of products with no image resolution loss, get the best results for an All-In-One-Price*

## ADVANTAGES

- *Sublimation is only One Price, what you see is what you Pay*
- *Sublimation printing uses absolutely no water creating no water waste during the process of dyeing fabrics making it environmentally friendly and more resistant to water and sun damage.*
- *The Tunaround Time is quick as the process is digital with fewer steps in production efficient.*
- *The dye sublimation fabric printing process offers vivid colors, wrinkle resistant, sharp text and deep saturated blacks and graphics longevity.*
- *Specially formulated inks sublimate into the fibers of the fabric, so the final product is virtually wrinkle free, washable and super lightweight.*
- *Colors can be extraordinarily brilliant due to the bonding of the dye to the transparent fibers of the synthetic fabric.*
- *Truly continuous tones can be achieved that are equivalent to photographs, without the use special techniques such as half-screen printing.*
- *The image can be printed all over the entire item, with no difficulty in printing all the way to the edges.*
- *The versatility of sublimation printing on textiles, gives you many new possibilities with more ways to promote upcoming events, tradeshow, meetings, product launches and much more...*
